## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Dependent claims 3 and 22, reciting a folded optical path, appear to be directed to the embodiment of Fig. 5. The independent claims from which dependent claims 3 and 22 depend, contain a step of capturing or a means for capturing. Yet, there is no apparent step or means of capturing in the embodiment of Fig. 5. Applicants need to either amend the written specification to explain how Fig. 5 discloses a capturing step and means, or they should cancel claims 3 and 22 and present new independent claims for that subject matter.

Applicant appears to confirm, in the remarks, that claims 3 and 22 are intended to be directed to the embodiment of Fig. 5. Applicant also remarks that the on time use camera is the image capturing step or the means for capturing. The examiner does not find this statement to be persuasive, because the one time use camera appears to be performing the recording step onto a film, not the capturing step. Dependent claims 3 and 22 do not appear to be supported by the embodiment of Fig. 5, because each and every step or element of the claim is not found in Fig. 5, or in any other originally disclosed embodiment.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2851

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 27 is rejected under 35 U.S.C. 102(e) as being anticipated by Fredlund et al. (U.S. Patent No. 6,628,895 B2)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Fredlund et al. discloses a public target 50. The camera 10 captures an image of the public target 100 using a fixture 50. The captured image is forwarded to the photofinisher 142. At least one photofinishing goods and/or services is obtained by the consumer 144, 146, 148. The capture image from public target 100 to generate the special images 144 is indicative of “a change to the nature of photofinishing of the images in sequence”.

Applicant’s remarks have been considered, but are not persuasive. Applicant refers to page 8 lines 11-22 and Fig. 9 setting forth that a public target may be, for example, a billboard or a large display such as a Jumbo-Tron™. The examiner has reviewed page 8 lines 11-22. It is not apparent from this passage, that the term “public target” would exclude the instruction card 100 of Fredlund et al.

Art Unit: 2851

***Allowable Subject Matter***

5. Claims 1, 2, 4-21, 23-26, and 31-33 are allowed.
6. Claims 28 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Reasons for Allowance***

7. The primary reason for allowance of claims 1, 2, 4-21 and 23-26 is the claim limitation for means or steps providing a photofinish instruction label on a one-time-use camera and recording a second instruction,, according to the first instruction from a display onto the film in the camera. The primary reason for indication of allowability of claims 28 and 29 is the claim limitation that the public target is a billboard or a large outdoor display screen. The primary reason for allowance of claims 31 and 33 is the claims 31 limitation for capturing a first target indicating a change to the nature of photofinishing of the images in sequence and capturing an image of a second target indicating a return to the original nature.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2851

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
